

Drilling

Overview

Drilling programs are a vital component of site characterization. With typically high operational costs, it is important that drilling campaigns are properly designed and coordinated to ensure maximum efficiency while maintaining a safe work environment.

Big Rock provides our clients with knowledgeable staff and project managers who have experience working on a large variety of drilling projects. Let us help you plan, design, manage or just confidently staff your next drilling campaign.

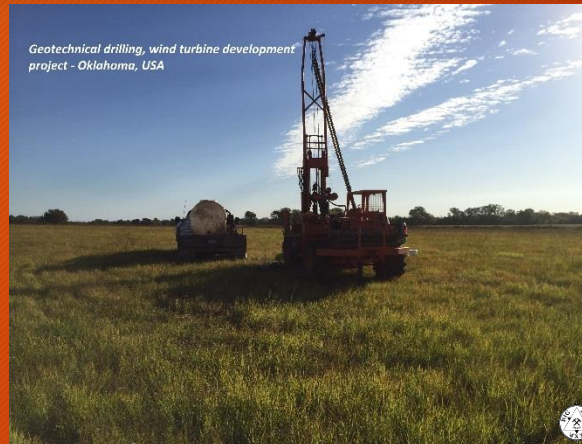

Drilling

Services Utilized

- ⌘ Drill Site Project Management for a variety of drilling projects:
 - ⌘ Diamond coring, air rotary, auger, sonic, direct push, etc...
 - ⌘ Surface, underground, exploration, resource, production, dewatering, geotechnical, etc...
- ⌘ Geological logging
- ⌘ Geotechnical logging
- ⌘ Hole locations & surveying

Industries Influenced

- ⌘ Exploration
- ⌘ Resource Development
- ⌘ Mining
- ⌘ Oil & Petroleum
- ⌘ Renewable Energy
- ⌘ Water Resources
- ⌘ Gold
- ⌘ Diamonds
- ⌘ Industrial Minerals
- ⌘ Cu, Ni, PGE
- ⌘ REE/REO

Drilling

Remote drilling project - Alaska, USA

Diamond drilling project - Minnesota, USA

Competitive Advantage

- ❖ Variety of drilling experience
 - ❖ Greenfields & Brownfields exploration
 - ❖ Test hole drilling
 - ❖ Resource drilling
 - ❖ PFS and PEA drilling
 - ❖ ADEX and production drilling
 - ❖ Geotechnical drilling
 - ❖ Hydro & dewatering drilling
- ❖ Reputable safety record
- ❖ Fully insured to international standards
- ❖ Tailored project solutions
- ❖ MSHA surface & underground certified
- ❖ Experienced in Major miners industry best practices
